SUMMARY

Investment Analyst with 6+ years of combined experience in finance and economic analysis. One year of experience as an Investment Analyst at a Pension Plan. Skilled in Excel, Python, R and SQL. Passed the CFA Level I exam.

EDUCATION

Master of Arts in Economics <i>Memorial University of Newfoundland and Labrador</i>	2022 – 2024 GPA: 3.42/4.00
Post-Graduate Diploma in Finance, Investments and Banking <i>Pontifícia Universidade Católica do Rio Grande do Sul</i>	2021 – 2022 GPA: 8.99/10.00
Bachelor of Science in Economics <i>Universidade Estácio de Sá</i>	2017 – 2020 GPA: 8.51/10.00

RELEVANT EXPERIENCE

Investment Analyst, Private Markets <i>Teachers' Pension Plan Corporation - NL</i>	Jul 2025 - Currently St. John's, NL
--	---

- **Portfolio Monitoring:** Evaluated fund performance with metrics such as IRR, TVPI, and Modified Dietz, providing senior leadership with data-driven insights across the private markets portfolio.
- **Cash Flow Forecasts:** Developed, monitored and updated comprehensive cash flow models to forecast fund contributions and distributions, directly optimizing liquidity management and capital call planning.
- **Due Diligence & Research:** Participated in rigorous fund manager assessments and detailed due diligence on new investment opportunities.

Financial Officer <i>Government of Newfoundland and Labrador - IET</i>	Jun 2024 - Jul 2025 St. John's, NL
--	--

- **Financial Analysis:** Analyzed business proposals and financial statements, supporting the assessment of complex applications for loans and grants.
- **Process Improvement:** Created comprehensive process documentation to streamline workflows and ensure compliance with regulations and alignment with the Business Growth Program guidelines. This initiative contributed to a 50% decrease in application processing time.
- **Advanced Excel Skills:** Developed and implemented Excel-based VBA solutions to automate routine tasks such as email generation and report templating, increasing efficiency and accuracy.

Economics Research Assistant <i>Memorial University of Newfoundland and Labrador</i>	Sep 2022 - Jan 2024 St. John's, NL
--	--

- **Economic analysis:** Proposed, developed and led research on the impact of excise tax cuts on gasoline prices, securing over **\$6,000** in research funding.
- **Data Analysis & Econometrics:** Designed and developed quantitative models to quantify policy impacts, by analyzing datasets with over **1 million** observations and writing more than **1,000** lines of code.

Middle Office Analyst / Investment Advisor <i>Invest Partner Ltda.</i>	Apr 2021 - Apr 2023 Remote, Brazil
--	--

- **Portfolio Management & Relationship Building:** Managed a diverse portfolio of **100+** clients with assets totalling **\$50 million**, showcasing knowledge of investment management practices and relationship building skills.
- **Financial Statement Analysis:** Developed customized reports on investment assets and performance, by analyzing **100+** stocks, bonds and derivative instruments.
- **Team Collaboration & Effective Communication:** Prepared and presented meetings to **30+** stakeholders, summarizing relevant policy and financial market news in four different languages.

SKILLS

Languages Fluent in French, English, Spanish and Portuguese.

Software Python, R, RStudio, SQL, Stata, Microsoft Suite (Excel, Word, Powerpoint).

Technical Research, Report Writing, Econometrics, Statistical Modeling, Cost-Benefit Analysis, DCF Valuation, Multiples Valuation, M&A Strategies, Portfolio Management, Risk Management, Monte Carlo Simulation.

PROJECTS

Automated Business Valuation Application | *Available Upon Request* **2024**

- I am developing a Python script that takes inputs such as current revenue, risk-free interest rate, Internal Rate of Return (IRR) and projected revenue growth to evaluate a company using the Discounted Cash flow method. The code for the function is ready and available upon request. I am currently working on a valuation example to add to the documentation.
- **Keywords:** Corporate Finance, Discounted Cash Flow, DCF, Python, Numpy, Pandas.

The Effect of the SSB Tax on Sugary Beverages in Newfoundland | [GitHub Link](#) **2024**

- Designed and implemented an econometric model to quantify the impact of the sugar tax on non-alcoholic beverages in Newfoundland. Results suggest that the non-alcoholic beverages sub-index of the CPI increased by \$ 5 in 2023.
- **Keywords:** Econometrics, Difference-in-Difference, Data Visualization, Policy Analysis, Python, Numpy, Pandas, Statsmodels, Linearmodels.

Monte Carlo Simulation Project | [GitHub Link](#) **2022**

- Utilized Python to implement a Monte Carlo simulation to assess the best and worst-case scenarios for the variation of the Brazilian stock index.
- **Keywords:** Monte Carlo Simulation, Risk Assessment, Python, Numpy, Pandas, SciPy.

Portfolio Optimization | [GitHub Link](#) **2022**

- Created portfolio with an expected annual return of 52 % and Sharpe ratio of 1.40, by utilizing the Efficient frontier concept to optimize risk and return metrics.
- **Keywords:** Markowitz frontier, Risk mitigation, Python, Numpy, Pandas, Pypfopt.

CERTIFICATES & AWARDS

- **Passed the CFA Level 1 Exam**
CFA Institute (2026)
- **Economics Presentation Competition - First Place Prize**
MUN Economics Society (2024)
- **Intermediate SQL**
DataCamp (2024)
- **Intermediate Python**
DataCamp (2022)
- **Financial Analysis**
Udemy (2020)
- **R Programming**
John Hopkins University (2019)
